PROFESSIONAL SUMMARY

Quantitative Economics student at UC Irvine with hands-on experience in machine learning, financial modeling, and data analysis. Builds and validates predictive models using Python and scikit-learn, with additional experience applying quantitative reasoning in national laboratory and academic settings. Seeking quantitative research and finance roles where analytical rigor and technical depth drive impact.

EDUCATION

University of California, Irvine

Expected 2029

B.S. Quantitative Economics GPA 3.0

Minor in History & Digital information systems

Relevant Coursework: Calculus I-III, C Programming, Probability and Statistics, Microeconomics, Macroeconomics

SKILLS

Programming: Python, SQL, C

Data & Modeling: pandas, NumPy, scikit-learn, Machine Learning, Statistical Analysis, Time-Series Analysis, Financial Modeling

Tools: Git, GitHub, Excel, Google Sheets

EXPERIENCE

MESA (MATHEMATICS, ENGINEERING, SCIENCE, ACHIEVEMENT) Assistant

Feb 2026 – Present

UCI Samueli School of Engineering

- Mentor engineering students through one-on-one academic coaching and technical problem solving.
- Facilitate college application and first-year success workshops for up to 100 STEM students.
- Develop instructional resources like presentations and project outlines including a Robot Car and Simon Says with Raspberry Pi and Arduino Uno that simplify technical concepts.

IT Intern

Jun 2024 – Jul 2024

Lawrence Berkeley National Laboratory

- Designed a STEM curriculum introducing K-12 students to computer hardware and computational thinking.
- Created instructional materials for hands-on learning activities.
- Programmed Raspberry Pi devices and documented technical workflows.
- Collaborated with educators and researchers in a national laboratory environment.

Apprentice

Jun 2023 – Jul 2023

Lawrence Berkeley National Laboratory

- Executed projects spanning data science, electronics, and scientific research across multidisciplinary STEM teams.
- Applied quantitative reasoning to analyze and interpret results across project areas.

PROJECTS

Stock Market Prediction Model github.com/nyow1219/Stock-Market-Predictor

- Built a machine learning pipeline in Python using pandas, NumPy, and scikit-learn to predict equity price direction.
- Engineered predictive features including moving averages, momentum, volatility, and lagged returns.
- Developed regression and classification models achieving approximately 70% directional classification accuracy.

Housing Affordability Analyzer github.com/nyow1219/Housing-Calc

- Built a web application that estimates affordable home prices using mortgage, DTI, PMI, property tax, insurance, and HOA calculations.
- Designed an interactive interface for comparing affordability scenarios across multiple financial inputs.
- Applied financial modeling concepts to real-world homebuying decisions.

ACTIVITIES & LEADERSHIP

Black In Technology (BIT)

Mentorship Outreach Officer

- Lead Break the Code STEM outreach program and mentor K-12 students in technology.

Whirlpool Corporation

Jul 2026

BUILD Externship Participant

- Selected to participate in Whirlpool Corporation's Emerging Leaders Program, gaining exposure to Whirlpool's brands, corporate culture, and consumer-focused innovation.
- Explored Whirlpool's World of Whirlpool Studios and R&D facilities, learning about product development, core product lines, and target consumer needs.
- Participated in professional development workshops and networking opportunities focused on resume building, mock interviews, personal branding, leadership, and Lean Continuous Improvement principles.

CERTIFICATIONS

- Oracle Dev Gym: Certificate of Excellence, Databases for Developers: Foundations (96%)
